## Letter of Congratulations on Achievement

Dear NSO,

On behalf of HCA, we would like to formerly congratulate NSO on your recent achievement of obtaining the required friction value standards and above for your newly developed bare Aluminum profiled helideck planking.

The bare aluminium profiled helideck, treated with a silicone substance, achieved the impressive result of 0.66mu, allowing this to be approved for both fixed and mobile helidecks to operate without a landing net.

This is not only a significant milestone for NSO, but for the aluminium helideck market in general. We look forward to witnessing the application of this cost-efficient and common sense solution in the offshore and marine market.

Efficient solutions are paramount in today's market, as such, by offering a helideck that doesn't require a landing net, micro-texture finish, or on-site friction testing, HCA is quite confident that NSO will be able to capitalize on this new solution. Another important factor is that your company is currently the only helideck supplier that can offer such a solution, which is why this is such a significant achievement.

We are thrilled for NSO and once again congratulate your team on a job well done. As always, we enjoy working together and please do not hesitate to contact HCA for your future helideck certification needs.

Yours faithfully,
